Subject: RIN 1210 – AB32

Dear Sir/Madam,

I wanted to take a moment to write during the comment period for the proposed rule in regard to trading options contracts in retirement accounts. I have taken the time to educate myself on the risks and benefits of using options to increase returns in my retirement account. I routinely sell covered calls to increase the overall return of my portfolio. I also sell puts on occasion to potentially buy stocks and ETF's I want to buy, at a discount to current prices.

This flexibility to trade options is critical tool for growth of retirement accounts in the current financial climate of ZERO interest rates.

Please consider my letter as a strong vote **AGAINST**, RIN 1210 – AB32, the proposal to eliminate options from retirement accounts.

Kind regards,

Shawn Piccione, MBA
